THE

ROYAL FREE HOSPITAL

LONDON

OUT-PATIENTS' DEPARTMENT

MESSRS.

H. V. ASHLEY & WINTON NEWMAN

ARCHITECTS

14 GRAY'S INN SQUARE

LONDON

W.C. 1

THE ROYAL FREE HOSPITAL
(OUT-PATIENTS' DEPARTMENT)

THESE Buildings were completed just prior to the outbreak of the War; the site at the back of the present Hospital and without any frontage, so to say, demanded that the Buildings thereon should be treated in the simplest manner possible and not one penny spent on Architectural Features as such, or on materials other than would ensure lasting quality and structurally sound—hence, in external treatment, plain brick buildings are evolved with many essential windows—and the only chance of obtaining any character is by judicious spacing of voids and solids, with some emphasis on the Entrances and the choice of different kinds of bricks, London stocks with Luton and multi-coloured red dressings, and a salt glazed dado being used—the Buildings generally are fire-resisting throughout.

The accommodation provided was somewhat unusual, since the Hospital required space for many departments, which, because more "beds" were required, had to vacate the Hospital proper; thus there are the following Departments:—Out-Patients', Casualty, X-Ray and Electrical Massage, Dental, and in addition, Nurses' Bedrooms, Students' Common Rooms, etc., Maternity Wards and Operating Theatre, and Maternity Students' Living-in-Quarters—accommodation for Ward Maids and Workshops in the Basement. The plans show how these varied requirements were obtained.

The Out-Patients' Department contains the usual Waiting Hall with Medical and Surgical Consulting Rooms, Examination Rooms and Dressing Cubicles suitably arranged; Operating Theatre with Dispensary and Dispensary Waiting Hall adjoining—the Casualty Department has its own Entrance and Waiting Hall with Men's and Women's Treatment Rooms, Operating Theatre and Observation Wards; on the First Floor, South and West sides, are the special Departments, and on the Second Floor over, the Maternity Department and Operating Suite; the First and Second Floors on the North Side are given over to the Nurses' Bedrooms, and on the Floor over Casualty, to the Ward Maids' Bedrooms with separate entrance.

The Maternity Department is complete with Labour and other Wards, Operating Theatre, Babies' Bathroom and other adjuncts; recently an extension to the Wards has been carried out on this Floor, and the Royal Free Hospital has a Gynæcological Unit with Professor attached thereto, necessitating special Laboratories and the like.

The whole of the Buildings were taken over by the War Office in 1914, and were used, with eminent success, as an Officers' Hospital for the duration of the War.

On the completion of these Buildings the Pathological Block was taken in hand and completely remodelled, involving the building of a large top-lighted P.M. Room, Mortuary and Museum, with Students' Laboratories and Research Rooms.

Much further work is in contemplation as funds permit, as this is the great Teaching Hospital for Women, the London School of Medicine for Women being allied to it, and plans for further Buildings to accommodate some 250 beds are under consideration.

NOTES.
The plan of a three roomed house has been selected, to indicate in detail the equipment and fittings so that there will be a minimum of moveable furniture to be provided by the tenant.
With a view to preserving and the securing of the best sanitary conditions, smooth slabs would be used, slate for hearth and skirtings, the fronts of the Wardrobes, drawers, &c., would be of Sanitas wood or enamelled iron; and bedsteads would be of enamelled iron tubes or pipes.

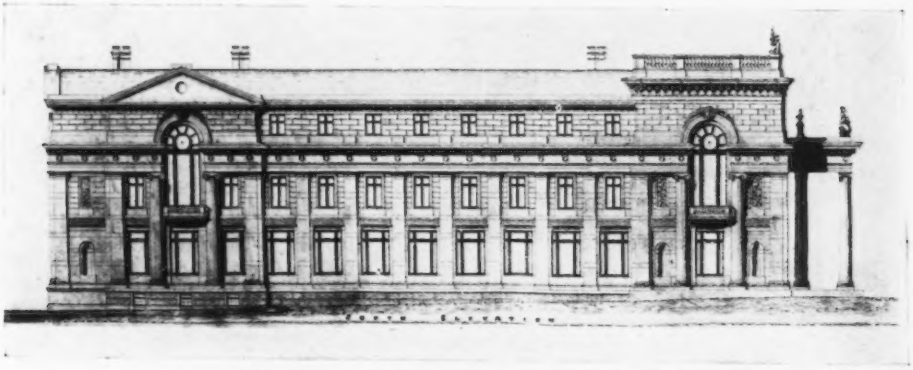
A GREAT BOOK on MONUMENTAL DESIGN

Of which only a small number of copies remain for sale.



One of the small Illustrations appearing in the Text.

Imperial 4to, handsomely bound in cloth, gilt, £5 5s. net.

MONUMENTAL CLASSIC ARCHITECTURE IN GREAT BRITAIN AND IRELAND DURING THE XVIIIth AND XIXth CENTURIES.

Illustrated by 80 Plates (size 14½ by 11 ins.), from special Photographs and from Drawings, and a large number of smaller Illustrations in the Text, with an account of the development of the Style, and of the Lives and Work of its chief exponents.

By Professor A. E. RICHARDSON, F.R.I.B.A.,

School of Architecture, University College, London.

This volume deals with the work of the period between 1760 and 1860, and is the first to illustrate adequately that type of Classic architecture which has much that is helpful and suggestive for modern problems of architectural design. It illustrates the work of Sir William Chambers, Elmes, Samuel Pepys Cockerell, Barry, Smirke, Playfair, and other extremely able but less known men.

One of the small Illustrations appearing in the Text.
